WORK EXPERIENCE

Accenture | Software Engineer (Full-Stack)

April 2026 – Present | Enterprise Seed-Production Platform (Agriculture)

- Built 10+ NestJS/TypeORM backend modules for a platform replacing a legacy PowerApps/Dataverse system across plants in 3 regions.
- Integrated Databricks SQL for read-only analytics with Azure PostgreSQL for operational writes, secured by Azure AD JWT validation and plant-level authorization.
- Authored 53 reversible database migrations and migrated legacy production data with timezone-accurate reconciliation.
- Delivered React 19 + TanStack Query screens with i18n and WCAG 2.1 AA accessibility through a CI-gated Azure DevOps pipeline.

Accenture | Software Engineer (Full-Stack)

November 2025 – April 2026 | Healthcare Application (Pharmaceutical)

- Delivered application features with React, Redux and Node.js REST APIs, secured with Azure AD single sign-on.
- Built a reusable UI component library, reducing frontend code redundancy by 35%.
- Maintained 80%+ unit test coverage with Jest and React Testing Library, and resolved SonarQube code-quality and duplication findings.

Accenture | Packaged App Dev Analyst

April 2024 – November 2025 | Enterprise Banking Platform (Financial Services)

- Developed Java/Spring Boot REST APIs consumed by React/Redux micro-frontend modules.
- Reduced API calls by 92% and re-renders by 80% by optimizing request patterns and adding caching.
- Built Ag-Grid dashboards with server-side processing to handle large banking datasets.
- Migrated legacy tests to React Testing Library, achieving 73% test coverage.
- Diagnosed frontend-backend integration and performance issues in an Agile delivery team.
